# How We Get Your Copier Serviced Anywhere in the USA

Pahoda Image Products relies on service techs all over the USA to provide quality copier service to our clients. Currently there are over 5500 copier techs in our vast network. On the new copiers, we use Xerox technicians, which means you get the same quality service just like if you bought from your local Xerox shop, but without having to call overseas when you are confused. You get the service support of a smaller company and the stability of a large company.

On the remanufactured products, we have a vast network of 2500 copier and printer techs all over the USA. We can offer 4 Hour response, or Next Business Day (depending on service area) - Our standard contracts are all Next Business Day, to help keep costs down.

FREE over the phone diagnosis ensures that service gets started off on the right foot. Our highly-trained team of technical support reps has over an 85% accuracy rate on parts suggestions that will complete the call on the very first trip. With extensive in-field experience, all of our support reps are more than qualified to assist our onsite field technicians and even your staff, in solving equipment problems quickly and efficiently over the phone.

## How Do You Get Supplies?

On the new copiers - we have simple software and your order ships overnight. We allow you safety stock on the shelf. You simply replace the toner as it is needed - take one off the shelf and order the replacement. It is that simple!

On the remanufactured copiers - We send you the toner you need to print the included pages (plus a bit extra to be sure). If you need more, you call us with the page count and we can send you more. 90% of the time, you will just have what you need on the shelf and at the end of year 1, you will get year 2's toner. With Pahoda Image Products, you should never be without the toner you need to keep printing!
